SUVAR GROUP

"Sustainable Education" project, aimed at helping schools in Kars, a region in Eastern Turkey, where many schools face significant challenges due to limited resources. We collected **old display stands** and creatively transformed them into functional bookshelves and cabinets. **All the materials** used in this project were **recycled**, helping reduce waste and promoting a more **sustainable approach** to resource management.

This project aimed to provide students with access to books and create an environment that fosters a love for reading and learning.
